

NASDAQ: ATCX

Unlocking Brazil's Critical Minerals Potential

Brief Corporate Presentation
February 2026

Forward-looking Disclaimer

This presentation contains forward-looking statements made under the "safe harbor" provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward looking statements are based upon the current plans, estimates and projections of Atlas Critical Minerals Corporation's management and are subject to risks and uncertainties, which could cause actual results to differ from the forward- looking statements. Such statements include, among others, those concerning market and industry segment growth and demand and acceptance of new and existing products; any projections of production, reserves, sales, earnings, revenue, margins or other financial items; any statements of the plans, strategies and objectives of management for future operations; any statements regarding future economic conditions or performance; uncertainties related to conducting business in Brazil, as well as all assumptions, expectations, predictions, intentions or beliefs about future events. Therefore, you should not place undue reliance on these forward-looking statements.

The following factors, among others, could cause actual results to differ from those set forth in the forward-looking statements: business conditions in Brazil, general economic conditions, geopolitical events and regulatory changes, availability of capital, Atlas Critical Minerals Corporation's ability to maintain its competitive position and dependence on key management. This press release does not constitute an offer to sell or the solicitation of an offer to buy any security and shall not constitute an offer, solicitation or sale of any securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such jurisdiction. We advise U.S. investors that as of now the projects listed do not have "reserves" as such term is defined in the Securities and Exchange Commission's Industry Guide 7.

Investment Highlights

Largest Portfolio of Critical Minerals

- ▶ Controls 218,000+ hectares of high-potential mineral rights in Brazil including:
 - ▶ Rare Earths
 - ▶ Titanium
 - ▶ Graphite
 - ▶ Uranium

High-Quality Project Pipeline

- ▶ High-potential rare earths projects located in the states of Minas Gerais and Goiás
- ▶ Samples with grades up to 28,870+ ppm TREO
- ▶ Multiple projects advancing simultaneously across various commodities

Geopolitical Importance

- ▶ China controls 90%+ of the world's rare earths processing capacity
- ▶ The U.S. defense sector is highly dependent: e.g. building a submarine requires over 4 tons of rare earths
- ▶ Brazil is a neutral jurisdiction with the world's 2nd largest rare earths reserves after China

Team with Proven Track Record

- ▶ Team with extensive Brazilian mining expertise
- ▶ Demonstrated ability to advance projects from exploration to production
- ▶ Track record includes Atlas Lithium's uplisting to Nasdaq; securing Tier 1 global strategic partnerships

Early Revenue Generation

- ▶ Iron ore operation started generating revenues in Q4, 2025
- ▶ Cash flow from iron ore mining will fund exploration costs for critical minerals

Critical Minerals Market Transformation:

Government Backing Creates Unprecedented Opportunity

- ▶ **July 10, 2025 - Historic Pentagon Investment:** \$400M DOD investment in MP Materials = largest gov't commitment to critical minerals sector
- ▶ **200% Premium Guarantees:** U.S. guarantees \$110/kg for rare earth oxides (2x current market) for 10 years
- ▶ **Wall Street Validation:** JPMorgan + Goldman providing \$1B financing; MP Materials +\$2.5B market cap overnight
- ▶ **Defense Premium Pricing:** F-35 needs 900 lbs REEs, submarine needs 9,200 lbs = sustained high-value military demand

PENTAGON TO BECOME LARGEST SHAREHOLDER IN RARE EARTH MINER MP MATERIALS; SHARES SURGE 50%

MANAGEMENT TEAM

Marc Fogassa
Chairman & CEO

- ▶ 20-yr experience in finance and executive management;
- ▶ Successfully grew Atlas Lithium (Nasdaq: ATLX) as CEO and Chairman
- ▶ Fluent in Portuguese, the language of Brazil
- ▶ MIT, double-major undergraduate; Harvard MBA

Rodrigo Menck
Chief Financial Officer & Treasurer

- ▶ Previously CFO of Sigma Lithium and Nexa Resources
- ▶ 25+ years of experience in the Financial and Natural Resources sectors

Eduardo Queiroz
Chief Technical Consultant

- ▶ 20+ years of experience managing complex, large-scale mining projects
- ▶ Previously General Manager of Planning and Management at Bamin (Eurasian Resources Group), managing projects over US\$3 billion
- ▶ Expertise in engineering oversight, environmental compliance, and risk management

Brian W. Bernier
VP, Investor Relations

- ▶ 35-yr experience in investor relations and capital raising
- ▶ Experience with corporate finance transactions and equity analysts

Areli Nogueira
VP, Mineral Exploration & Director

- ▶ Expert geologist in multiple critical minerals
- ▶ Founder and former CTO of MineXplore, mineral rights database
- ▶ Former analyst at the Brazilian mining department

Joel Monteiro, Esq.
VP, Administration & Director

- ▶ Expertise in the interface with government regulators, contractors, and communities
- ▶ Former partner and head of business law in prestigious mid-size Brazilian law firm

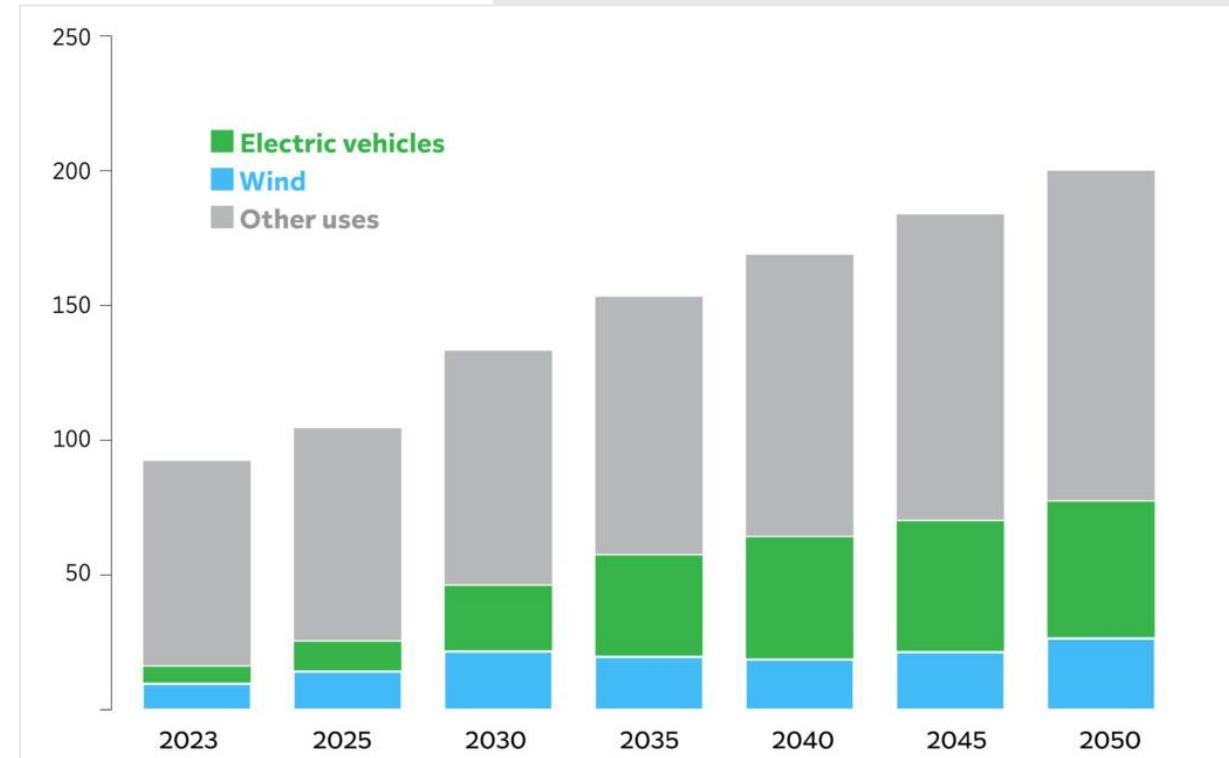

Rare Earths & Titanium

Rare Earths Demand

Geopolitical Context

- ▶ Global demand for magnet rare earth elements (Nd, Pr, Dy, Tb) projected to more than double from 2023 to 2050, with EVs accounting for ~40% of demand by 2050
- ▶ Rare earth elements provide unique magnetic and heat-resistant properties essential for advanced military systems including precision weapons, radar, and electronic warfare equipment
- ▶ China currently controls ~70% of global rare earth mining and ~90% of processing capacity as of August 2024, creating supply chain vulnerabilities for Western economies

NOTE: DATA CORRESPONDS TO THE INTERNATIONAL ENERGY AGENCY'S SCENARIO OF ANNOUNCED CLIMATE PLEDGES. DEMAND FOR MAGNET RARE EARTH ELEMENTS COVERS PRASEODYMIUM (PR), NEODYMIUM (ND), TERBIUM (TB) AND DYSPROSIIUM (DY).

SOURCE: INTERNATIONAL ENERGY AGENCY (MAY 2024)

Rare Earths

Diversified Portfolio

- ▶ **53,939 hectares across 33 mineral rights** in Minas Gerais and Goiás
- ▶ Two primary project areas: **Alto Paranaíba Project** (Minas Gerais) and **Iporá Project** (Goiás)
- ▶ **Diversified rare earths portfolio strategy:** two distinct rare earth deposit types; reduced geological risk; enhanced development optionality
- ▶ **Strong initial results reported**
- ▶ SGS is a premier global mineral evaluation company; SGS geologists serve as QPs for our Rare Earths projects
- ▶ SGS-authored **SK-1300 Property of Merit** report for Alto Paranaíba project was published on August 14, 2025
- ▶ SGS-authored **SK-1300 Property of Merit** report for Iporá project was published on October 3, 2025

Alto Paranaíba Project

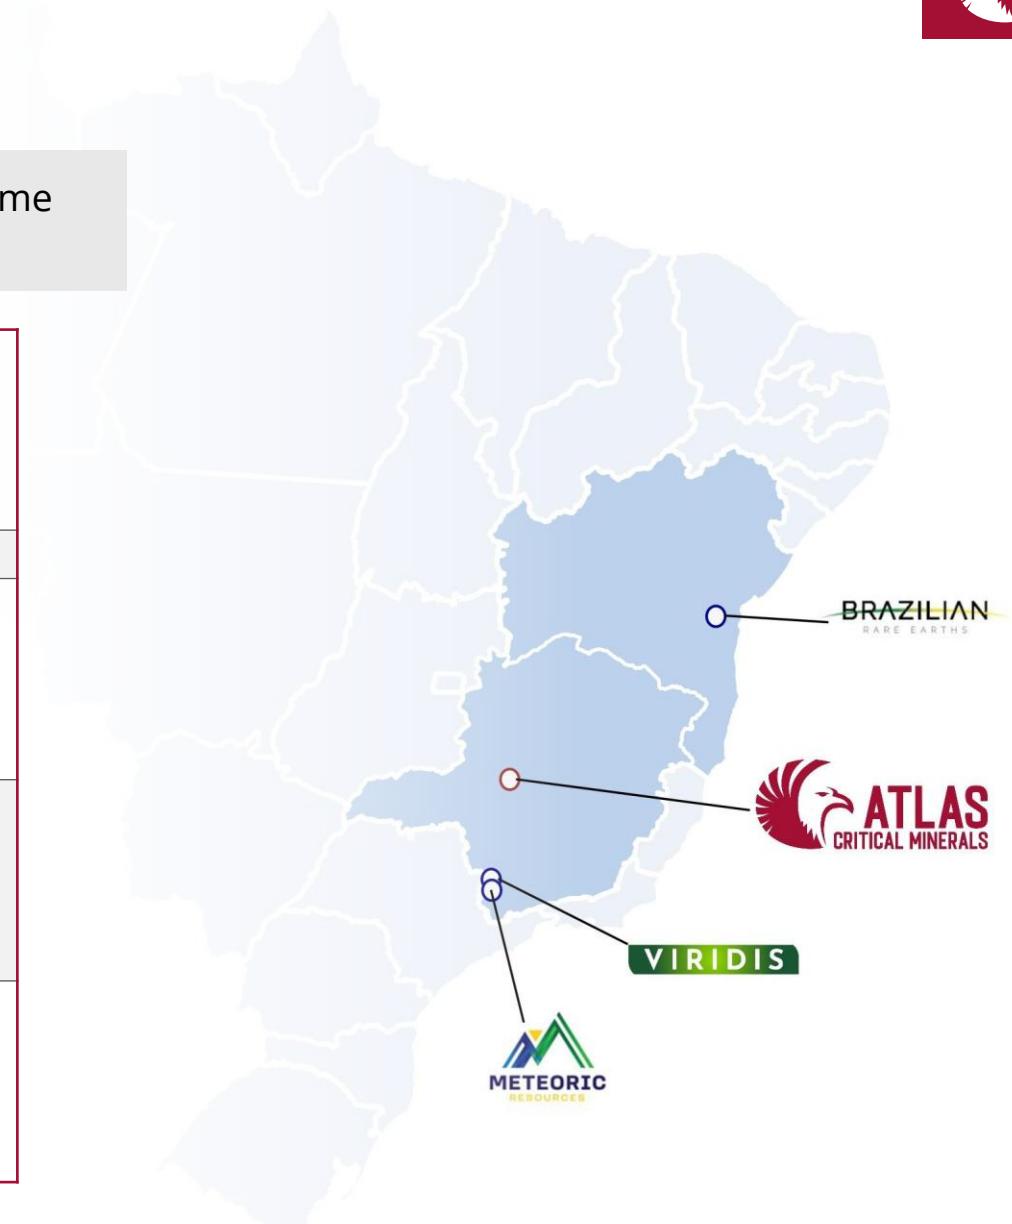

Proven Region For Rare Earths

Atlas Critical Minerals, with its Alto Paranaiba project, has the potential to become an important global player in supply chain of rare earth elements.

	Atlas Critical Minerals	Brazilian Rare Earths	Meteoric	Viridis
	NASDAQ: ATCX	BRE.ASX	MEI.ASX	VMM.ASX
Project Metrics	2,000+ Mt (Projected)	510 Mt (2023)	1,500 Mt (July, 2025)	201 Mt (2024)
Average Overall Grade	4,818 ppm TREO + 12% Titanium	1,513 ppm TREO	2,359 ppm TREO	2,590 ppm TREO
MREO Grade	1,352 ppm / 28% to TREO	~425 ppm / 28% to TREO	526 ppm / ~24% to TREO	~668 ppm / 26% to TREO

Alto Paranaíba Project

Rare Earths & Titanium

Alto Paranaíba Project Initial Drilling

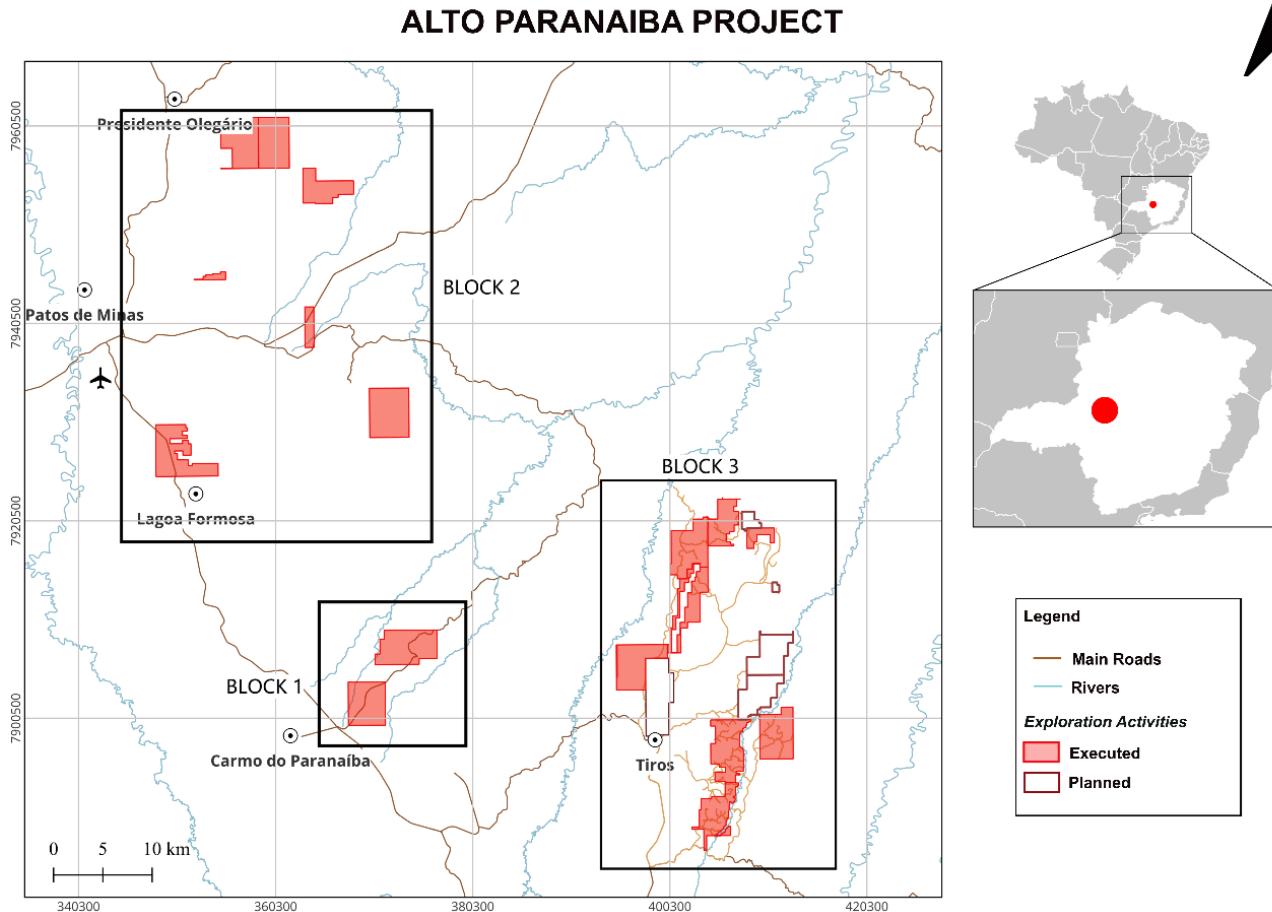

11 Auger Drillholes Produced Material for Mineralogical Tests

Alto Paranaíba Project (APP)

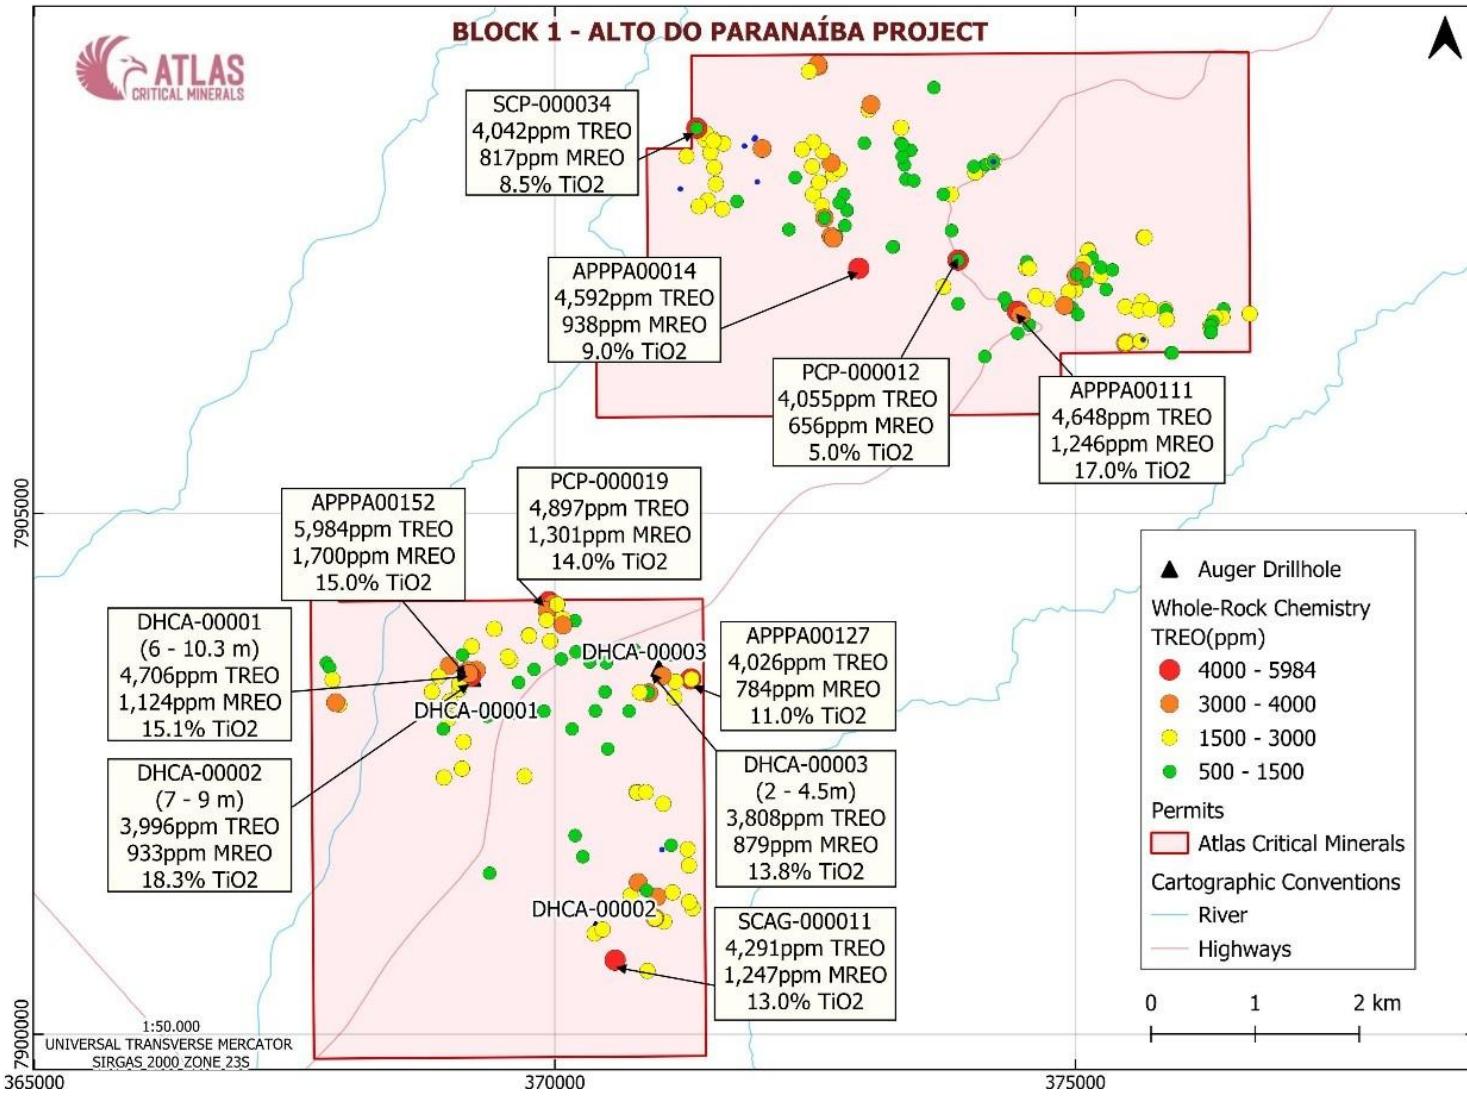

Highlights

- ▶ **21 mineral rights** located ~350km from Belo Horizonte, capital of Minas Gerais
- ▶ **Favorable geology:** Capacete Formation hosting rare earths alongside titanium
- ▶ **Three distinct exploration blocks** being systematically evaluated:
 - ▶ Block 1 (Carmo do Paranaíba)
 - ▶ Block 2 (Patos de Minas)
 - ▶ Block 3 (Tiros)
- ▶ **Initial exploration yielded exceptional results:** samples with up to **28,870 ppm TREO** and **23.2% TiO₂**

Outstanding Metallurgical Recovery Results

- ▶ Initial testwork achieves **up to 97% extraction** for Magnetic Rare Earths Elements (MREE) using the Altilium Ti/REE Process™
- ▶ Light Rare Earth Elements (LREE): **95.2% extraction**
- ▶ Total Rare Earths plus Yttrium (TREY): **93.8% extraction**
- ▶ Heavy Rare Earth Elements (HREE): **83.9% extraction**
- ▶ **Titanium concentration upgrade:** 97% of TiO₂ to leach residue (13.4% → 26.0%)

97%
MREE Recovery

LREE: 95.2%
TREY: 93.8%
HREE: 83.9%

Testing at **SGS Canada Inc.**, a premier global mineral evaluation company

Test	TREY	LREE	MREE	HREE
Leach 1 (Direct)	57.7%	57.1%	62.1%	63.4%
Leach 2 (Roasted)	93.8%	95.2%	97.0%	83.9%

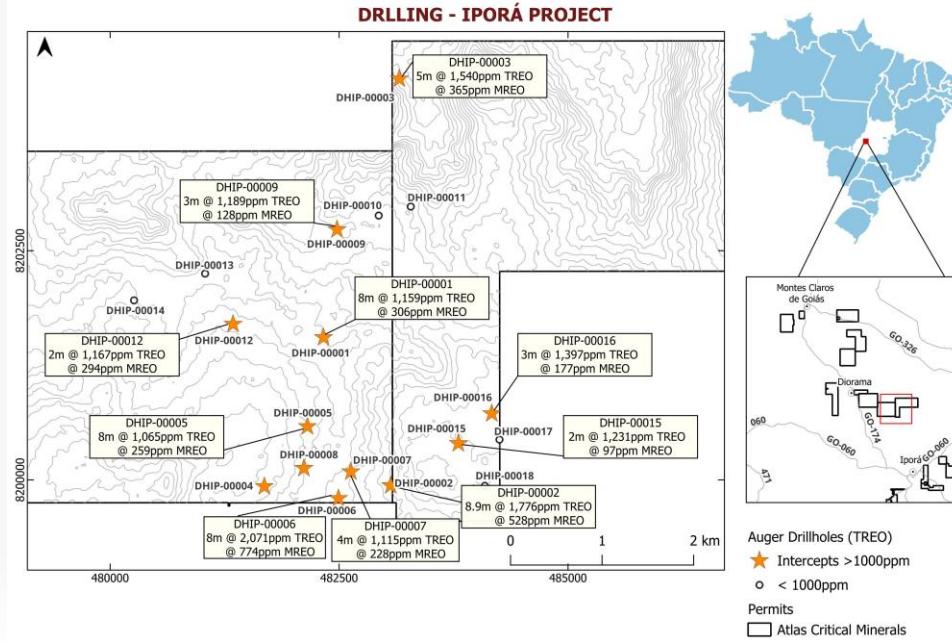

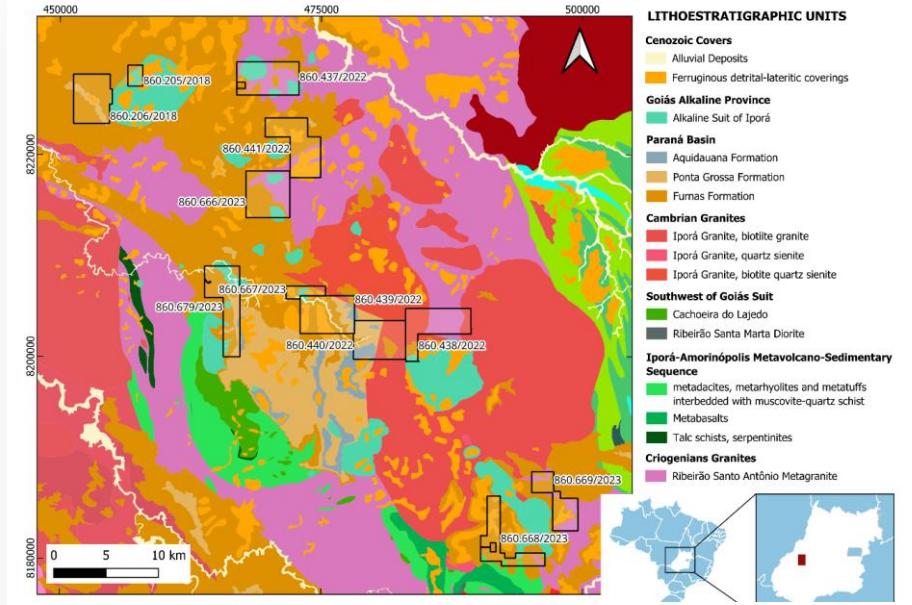

Iporá Project

Rare Earths

Iporá Project

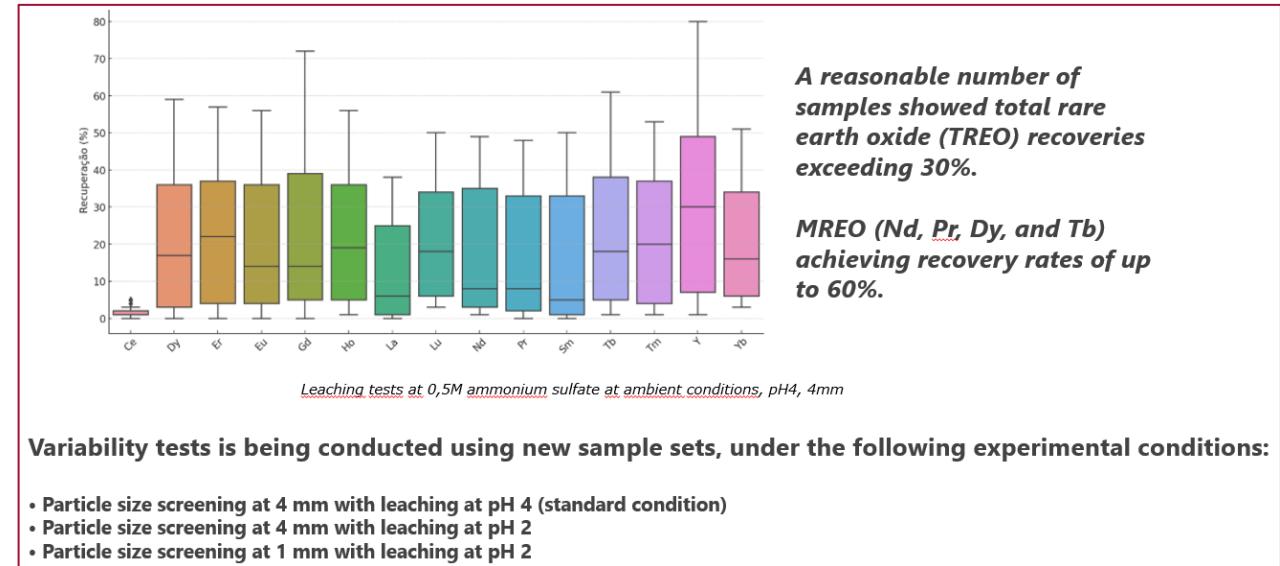

Proven Region For Rare Earths

- ▶ 18,615 hectares (46,000 acres) across **12 mineral rights** in Western Goiás State
- ▶ **High-grade drilling intercepts** including 8m at 2,071 ppm TREO and 774 ppm MREO in DHIP-0006
- ▶ **Extensive mineralized zones** with multiple drillholes exceeding 1,000 ppm TREO across 8-11 meter near-surface intervals
- ▶ **Strategic location advantage:** Goiás State hosts Serra Verde, one of the only integrated rare earths operations outside Asia
- ▶ **Favorable geology:** Iporá Alkaline Complex creating **optimal conditions for ionic clay deposits**

- ▶ **MREO recovery rates exceeding 60%** for critical permanent magnet elements
- ▶ Heavy Rare Earth Oxides (HREO): 55% recovery
- ▶ Yttrium: 63% recovery
- ▶ TREO: 36% recovery under standard conditions

* Recoveries based on samples with 25% total TREO recovery cut-off

Malacacheta Project

Graphite

- ▶ Strategic portfolio of several mineral rights in Minas Gerais and Bahia, Brazil
- ▶ Prime position in critical minerals market as **graphite demand soars** for EV batteries and nuclear uses
- ▶ Industry forecast: **97 new flake graphite mines needed by 2035**
- ▶ SGS-authored **SK-1300 Property of Merit** report for Malacacheta graphite project was published on August 14, 2025

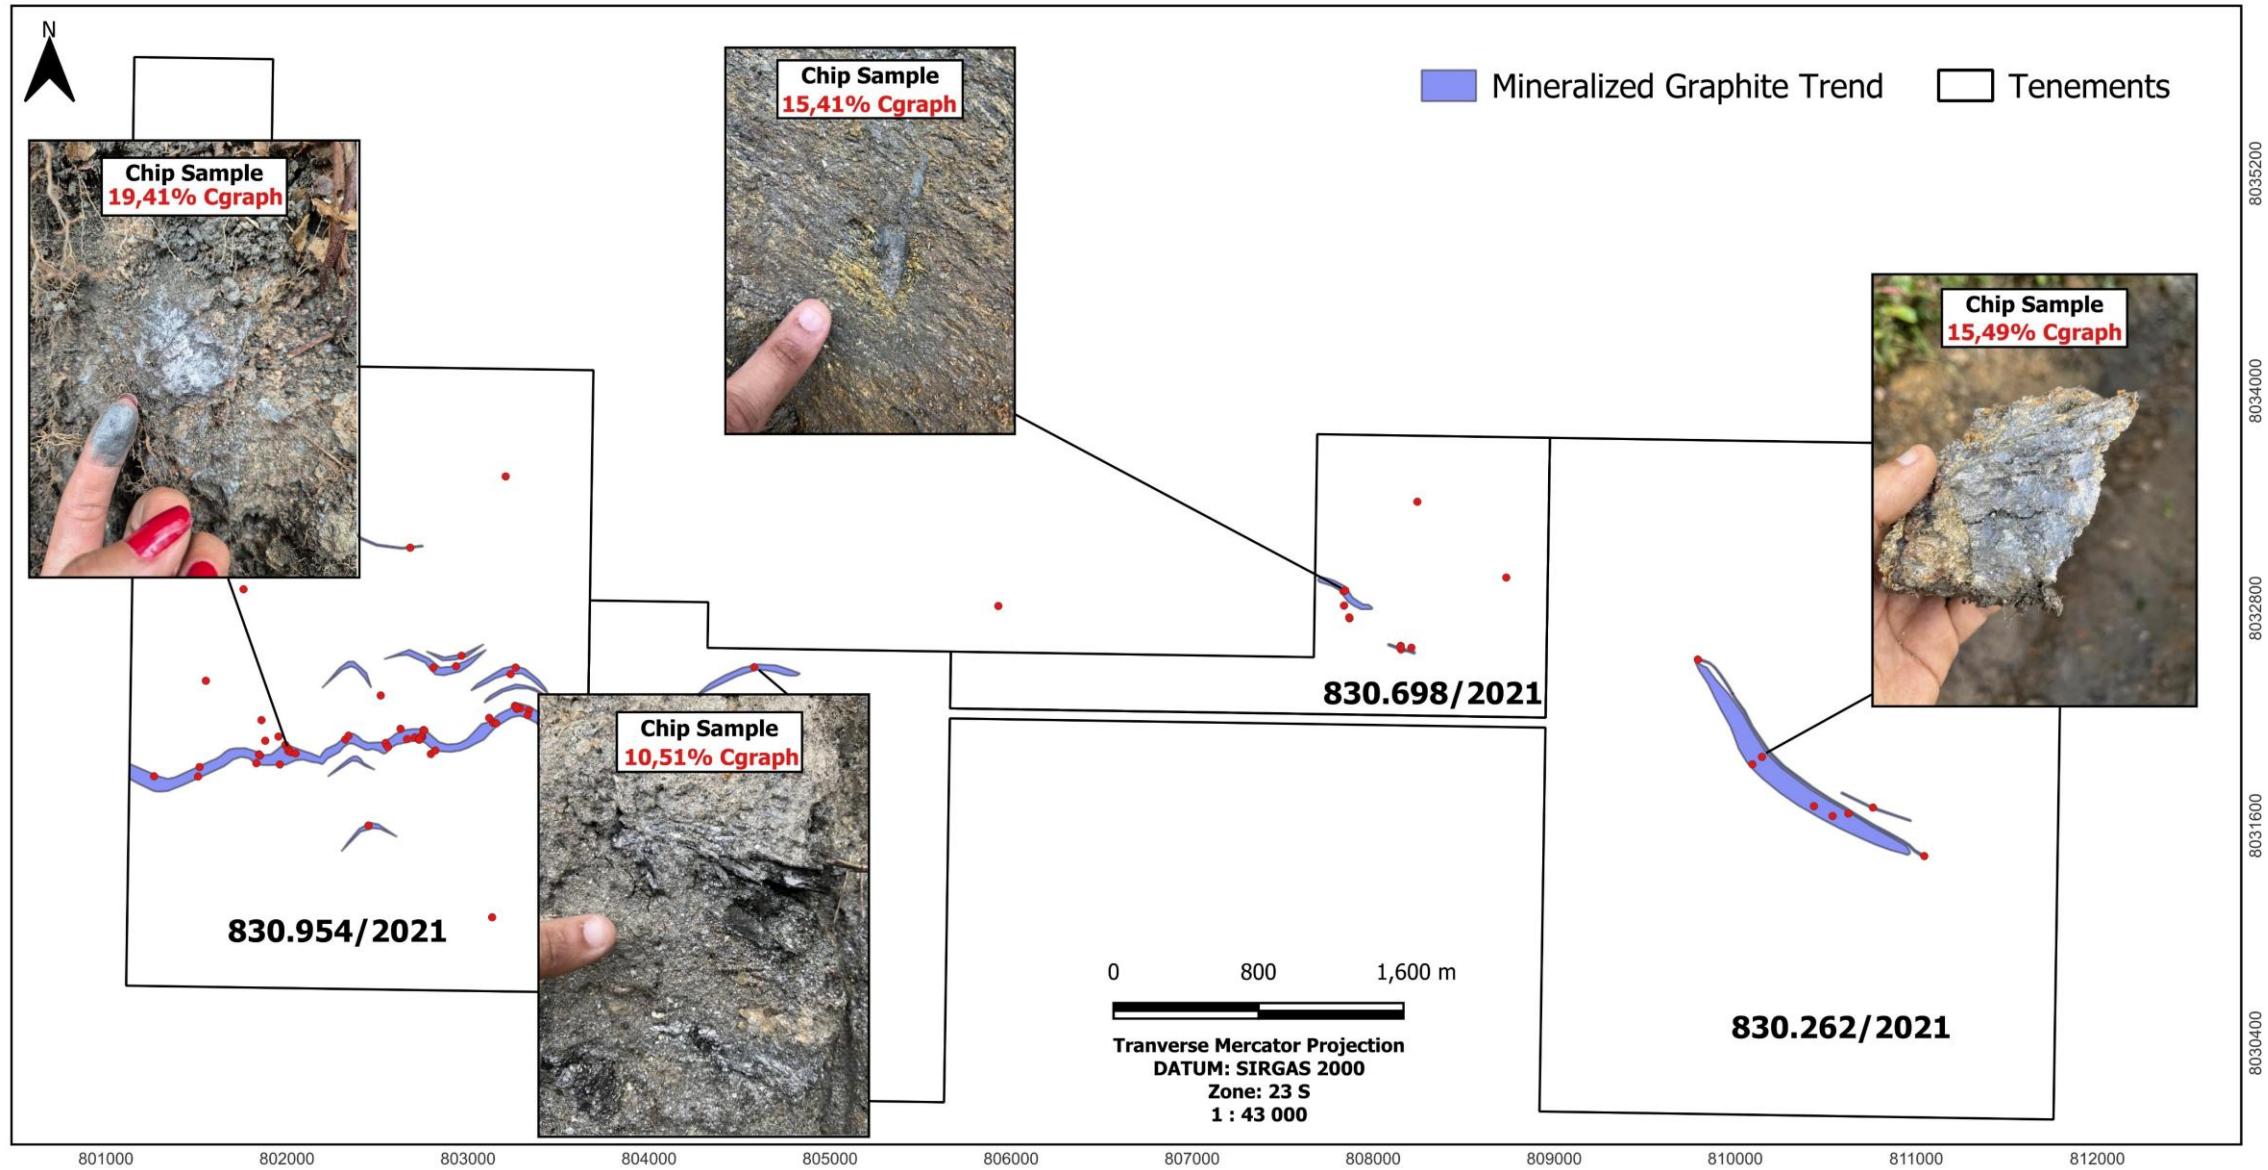

Malacacheta Project

1,258 hectares with **visible surface graphite** occurrences and significant potential

High-Quality Large-Flake Graphite Deposit

Excellent Exploration Results

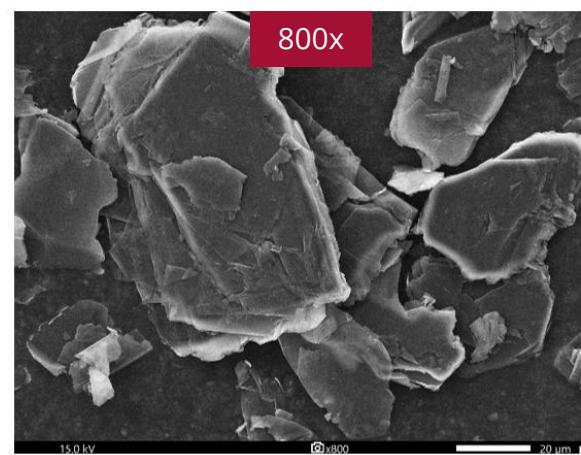

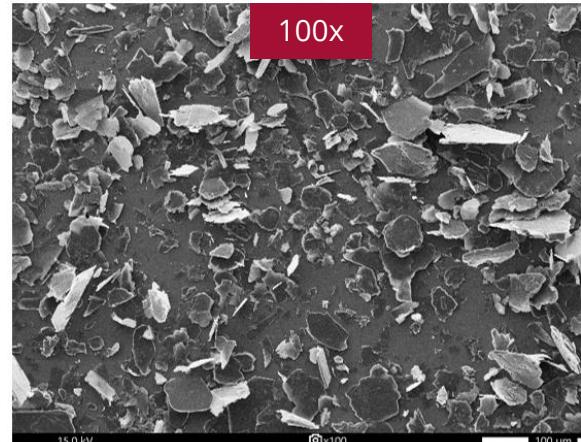

Graphite Concentrate

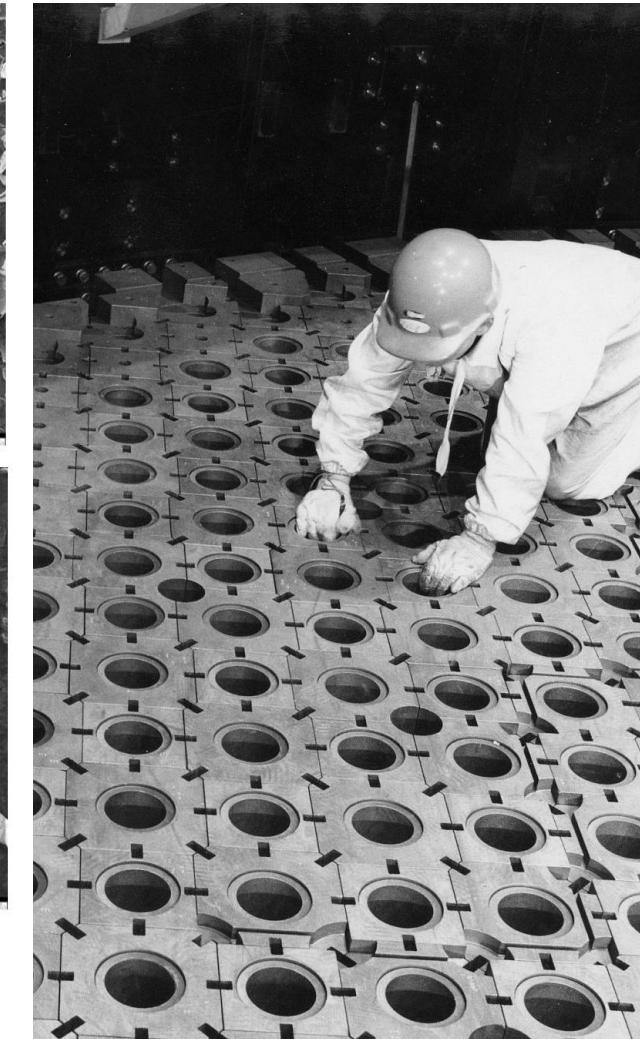

Nuclear-Grade Graphite Confirmed

- ▶ **Independent U.S. laboratory testing achieved exceptional 99.9995% carbon purity** – meeting stringent nuclear-grade specifications and positioning Malacacheta graphite for ultra-premium market applications
- ▶ **Robust crystalline flake structure confirmed** – SEM analysis shows thick, clean flake particles (~5 μm) comparable to premium Chinese deposits, with BET surface area (0.89 m^2/g) competitive with global industry leaders
- ▶ **10-15x premium pricing opportunity** – nuclear-grade graphite commands \$25,000-\$35,000 per tonne versus \$2,000-\$2,400 for standard high-quality flake graphite

Scanning Electron Microscopy images at 100x and 800x magnification showing clean, pure crystalline flake structure

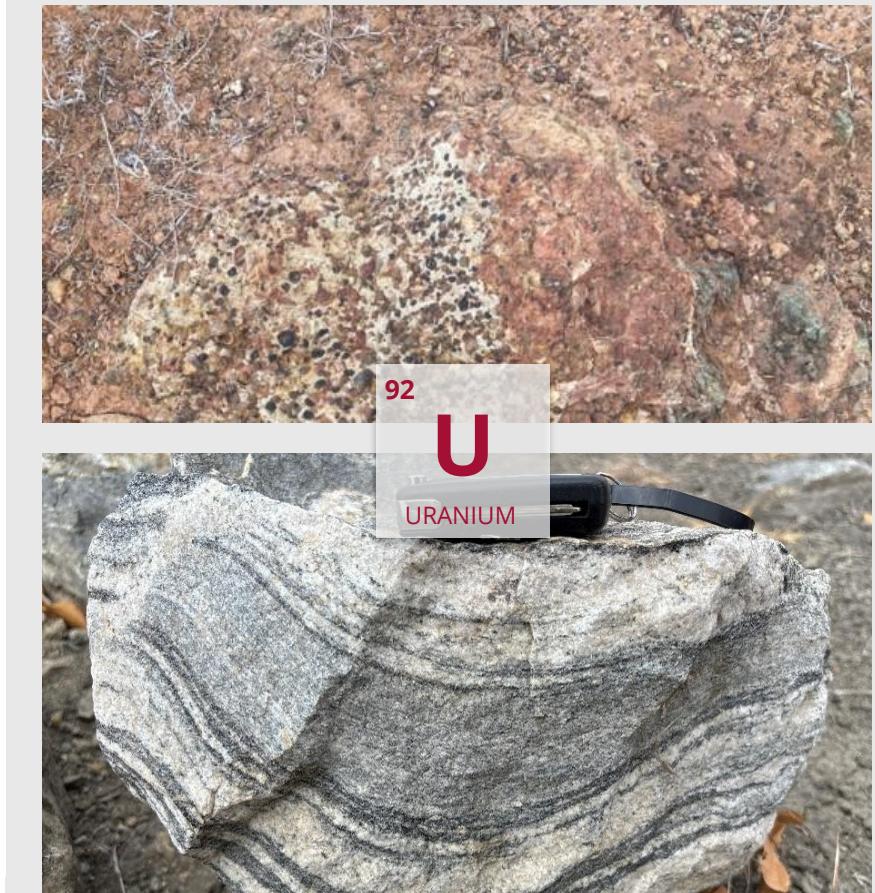

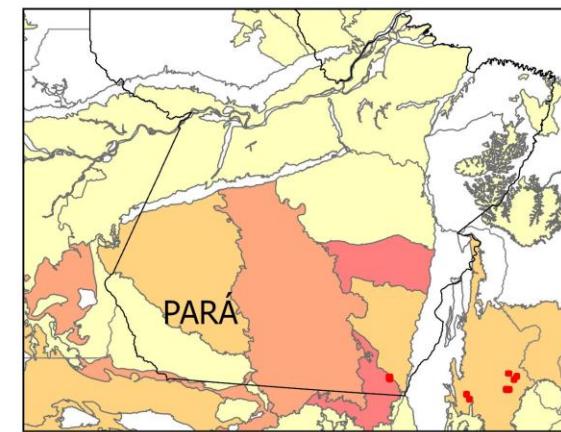

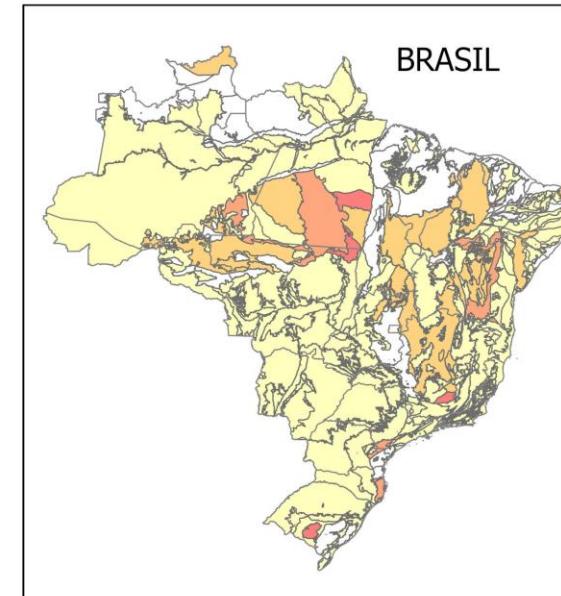

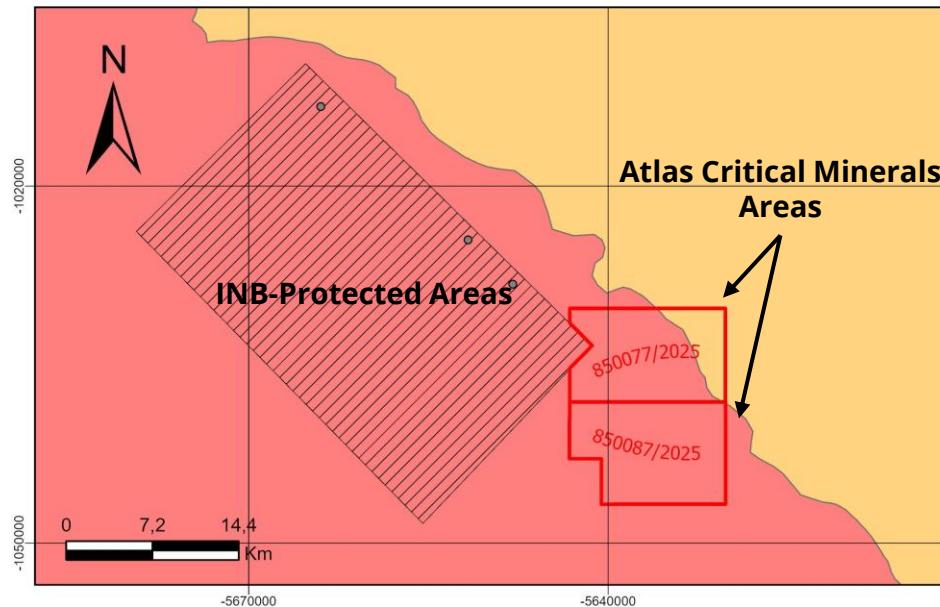

URANIUM

Uranium

- ▶ **Portfolio:** 143,725 hectares across 39 mineral rights in Bahia, Ceará, Goiás, Piauí, Pará, and Tocantins states in Brazil
- ▶ **Highly strategic areas secured** next/close to areas delineated by INB as restricted due to uranium deposits
- ▶ **Operational Approach:** Applications list copper, phosphate and/or rare earths as primary minerals due to current Brazilian legislation prohibiting uranium as primary mineral
- ▶ **Market Opportunity:** Global uranium prices exceeding \$70/pound in 2024 driven by nuclear energy growth, decarbonization goals, and supply constraints
- ▶ **Future Positioning:** Potential legislative changes, aligning with long-term critical minerals strategy

Uranium

Rio Piracicaba Project

Iron Ore

RIO PIRACICABA

Iron Ore Project Generating Revenue

- ▶ 188.31-hectare area located in **Brazil's Iron Quadrangle**, the largest mineral province in the country, and immediately next to Vale's Água Limpa iron ore mine
- ▶ Our **SK-1300 technical report** showed 7,852,912 tons of iron ore reserves with 32% Fe average grade; laboratory tests achieved **64.8% Fe** product
- ▶ All needed permits secured for 300,000 tons/year extraction; **started generating revenues in Q4, 2025**

26
Fe
IRON

Corporate Upside

Corporate Upside

- ▶ **Multiple near-term value catalysts** across diversified project portfolio with staggered development timelines
- ▶ Rare Earths market transformation underway: **Pentagon's historic \$400M investment** in MP Materials. Atlas Critical Minerals controls Brazil's **largest Rare Earths portfolio** with **dual deposit types** enhancing development optionality
- ▶ **Nuclear-grade graphite confirmed** at Malacacheta with 99.9995% purity, commanding 10-15x premium pricing
- ▶ Initial **SK-1300 technical reports** filed for key Rare Earths and Graphite projects; systematically advancing multiple assets through the mining study cycle toward development decisions
- ▶ Rio Piracicaba iron ore project **started generating revenues in Q4, 2025** with cashflows contributing towards critical minerals exploration costs
- ▶ **Strategic uranium portfolio** across 39 mineral rights positioned for potential legislative reform in Brazil
